## Introduction

The SA Platform uses Web and security technologies, giving users ubiquitous remote access to corporate resources using a Web browser. This document describes the platforms (operating system/browser combinations) that have been qualified for use with the SA.

## SA Hardware Requirements

Service Package Version 6.4 is supported on the following SA platforms:

- Juniper Networks Secure Access 700
- Juniper Networks Secure Access 2000
- Juniper Networks Secure Access 2500
- Juniper Networks Secure Access 4000
- Juniper Networks Secure Access 4000-FIPS
- Juniper Networks Secure Access 4500
- Juniper Networks Secure Access 4500-FIPS
- Juniper Networks Secure Access 6000
- Juniper Networks Secure Access 6000-FIPS
- Juniper Networks Secure Access 6000 Service Provider
- Juniper Networks Secure Access 6500
- Juniper Networks Secure Access 6500-FIPS

## Platform Support

Juniper Networks tests the aforementioned functionalities of the SA Platform on most widely used corporate and consumer platforms to qualify each platform as either qualified or compatible.

The platforms in this list are divided into two categories: compatible and qualified. The complete list of platforms/browsers in the document is supported. If problems are encountered on either a qualified or a compatible platform then Juniper support will attempt to resolve the issue.

### Qualified Platform

The platforms listed in the “qualified” category have been systematically tested by QA department as part of the release covered by the Supported Platforms document.

### Compatible Platform

The platforms listed in the “compatible” category have not been systematically tested by our QA department in this release but based on testing in previous releases and knowledge of the platform Juniper expects that the functionality will work and will fully support these platforms.

## **Multiple Language Support**

All the end-user functionality has been localized in German, French, Japanese, Traditional Chinese, Simplified Chinese, Spanish, and Korean. The administrator user interface is supported in English only.

## Adaptive Delivery for Juniper client applications

In cases where ActiveX is disabled or is not available due to platform or privilege limitations, the client application is installed using Java. Adaptive delivery is available for WSAM, Network Connect, Windows Terminal Services, and Secure Meeting clients.

Microsoft JVM, or Sun JRE 1.5.07 or greater must be installed on the client system to utilize adaptive Delivery for Juniper client applications.

## Juniper Installer Service

Juniper Installer Service is supported for the following client applications: Network Connect, Windows Secure Application Manager (W-SAM), Host Checker, Cache Cleaner, and Terminal Services.

### Qualified platforms:
